WORK EXPERIENCE

- 2025 Mar - present **Clipboard Health**
Software Engineer
- Engineer on the shift pricing team for a healthcare staffing marketplace serving 6,500+ workplaces and 1M+ workers.
- Built the infrastructure integrating ML models into the pricing path (S3, SageMaker, Snowflake), feeding predictions of shift desirability, facility cancellation, and worker cancellation into live pricing.
- 2024 Oct - 2025 Mar **Genie AI**
Software Engineer (Editor)
- Added MS Word comment import and export to Genie's editor.
- Implemented testing strategy to improve reliability of document import and export.
- 2023 Jan - 2024 Sep **Independent Research & Development**
Sabbatical
- Prototyped local-first editor and knowledge-management tooling with a cofounder.
- Built the supporting libraries in Nim: incremental view maintenance via differential dataflow, and persistent immutable collections compiling to both native code and WebAssembly.
- 2021 Sep - 2022 Dec **Reify Health**
Senior Software Engineer
- Built user-facing dashboards for timely task tracking in clinical trial site operations.
- Maintained and expanded a shared components library.
- 2021 Jan - 2021 May **Roam Research, Inc**
Software Engineer
- Built and prototyped UI/UX components to support novel knowledge-management workflows.
- 2019 Oct - 2020 Dec **Deseret Digital Media**
Software Engineer
- Designed and built the software and interfaces for an entirely new business model, working across product, design, and engineering.
- Built dashboards for customer service, analytics, and stakeholders.

EDUCATION

- 2017 Oct - 2019 Jun **Master of Arts: Sculpture**
Royal College of Art - London, UK

PROJECTS

Temen **RUST** AGENT-ASSISTED

A WebAssembly alternative for running untrusted native code — Cranelift JIT, capability-based host access, real virtual memory, and a generative differential fuzzer checking the JIT against a reference interpreter.

github.com/theSherwood/temen

jacl **C** AGENT-ASSISTED

A gradually typed command language crossing Tcl with Lisp — unboxed typed values, a work-stealing runtime, a tracing GC, and a C FFI for embedding.

github.com/theSherwood/jacl_impl

Sinuous libraries **JAVASCRIPT**

Context, scoped styles, and 2-way element bindings for the Sinuous UI library

github.com/theSherwood/sinuous-context, -style, -bind

SKILLS

PROFESSIONAL

TypeScript
JavaScript
Clojure
SQL
React
Solid

PERSONAL

Nim
C

7 GUIs **MULTIPLE**

Implementations of the 7 GUIs benchmark across a range of languages and UI frameworks

github.com/theSherwood/7_GUIs

Mentat **JAVASCRIPT**

TiddlyWiki plugins providing an OS-style windowed interface

github.com/theSherwood/Mentat
